Dear Mr. Jerome:

Re: CYTEC Carteret Impoundments (Landfill) Site  
Carteret Borough, Middlesex County

The New Jersey Department of Environmental Protection (NJDEP) has reviewed the Remedial Action Plan (RAP) Addendum dated February 1995, prepared by Blasland, Bouck & Lee. The RAP Addendum is approved with the following comments:

- ✓ 1. Ground water and surface water monitoring must be performed on a semi-annual basis for five years in accordance with the schedule identified in the report. For both surface water and ground water monitoring programs, analytical parameters must include: Volatile Organic Compounds (Benzene and Chlorobenzene) and Inorganics (Aluminum, Arsenic, Total and Free Cyanide, Iron, Manganese, Silver and Thallium). Antimony must also be analyzed for surface water due to its rejection under data validation for the previous sampling event. This requirement for analytical parameters was specified in my letter dated November 29, 1994 but has not been addressed in the RAP Addendum.
2. Information provided in Section 5.2 concerning the Declaration of Environmental Restrictions (DER) is acceptable. The DER must be recorded in the local County Office. Please provide the executed DER (after recording with the County Office) to us within 60 calendar days after receipt of this letter.
3. Deficiencies identified in the organic and inorganic data validation report forms (Appendix D) must be corrected in the future sampling and analysis events. If not, the NJDEP may not accept the data and require re-sampling and re-analysis.

If you have any questions, please contact me at (609) 633-1455.

Sincerely,

Haiyesh Shah, Case Manager  
Bureau of Federal Case Management
